To the installation guide:

B-System GmbH

B-System backboxes are standard solutions for the easy integration of loudspeakers and technology in concrete ceilings, brick or concrete walls and in drywall constructions.

Our system architecture allows for a wide range of options, even for demanding applications, and is suitable for all common loudspeaker brands and models.

We use only high-quality and robust components. Our backboxes support the audio quality of all built-in

speakers and protect the technology from dirt, moisture, dust and insects.

Our products have been in use thousands of times world-wide for many years, our installation workflows are established and standardised. B-System customers and partners have access to numerous planning documents, data sheets and installation instructions.

The B-System team will be happy to consult you personally!
